European Drug Index Niels F. Muller,Rudolf P. Dessing,2022-03-07 Many health care providers are frequently dealing with problems related to the identification and interpretation of medicines and prescriptions of foreign origin. Health authorities, customs and travel agencies also encounter such problems, which are related to the increasing mobility of the European population. Thus the need for a European Drug Index is obvious. The EDI provides extended information for practitioners confronted with the enormous number of drug names available on the European pharmaceutical market. This market is increasing due to the rapidly changing palette of countries and economic restrictions in Europe. The listings have been derived from drug data sources from the increased number of participating countries in this second edition. Each item starts with a trade name, in alphabetical order, followed by (depending on the original source) dosage forms, strength, volume (if applicable), and generic name(s) of the active principle(s) in a random sequence. The item is concluded by the Anatomical Therapeutic Chemical (ATC) classification (when made available by the original source) and a code for the country of origin.

Clinical Dermatology Richard B. Weller,John A. A. Hunter,John Savin,Mark Dahl,2013-05-30 This best selling text has been completely revised and refreshed in the fourth edition. The authors aim to enthuse family doctors (for whom they are primarily writing) to enjoy the challenge of diagnosing and treating skin conditions. Clinical Dermatology contains over 500 high quality pictures and diagrams matched with many colourful phrases to illustrate and entertain as it teaches. It has established a reputation as a 'way of learning' and as a cogent overview of the subject for the aspiring specialist. Readers are guided through the maze that too often lies between the presenting skin complaint and its final diagnosis and treatment. The authors have created an easily read text with enough detail to clarify the subject but not enough to obscure it. This fourth edition contains new chapters on racially pigmented skin, dermatology of different age groups and cosmetic dermatology. Relevant internet sites are now clearly highlighted at the end of each chapter and the comprehensive formulary has been

updated.

Handbook of Chemical Synonyms and Trade Names William Gardner, Edward I. Cooke, Richard W.I.

Cooke, 2019-07-23 To this Eighth Edition of the late Mr William Gardner's Chemical Synonyms and trade Names there have been added some 3,300 new entries, principally in the field of plastics, alloys and pharmaceuticals. A number of entries describing products known to the Editors to be no longer commercially available have been deleted, with the principal object of keeping the bulk of the book within reasonable bounds; but it has been possible to add nearly 400 names to the Index of Manufacturers to be found at the end of the book. The sum of these additions and deletions represents a net increase of about 10 per cent, in the scope of this Eighth Edition as compared with its predecessor published in 1971.
