Making Medicines Affordable National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Ensuring Patient Access to Affordable Drug Therapies, 2018-03-01

Thanks to remarkable advances in modern health care attributable to science, engineering, and medicine, it is now possible to cure or manage illnesses that were long deemed untreatable. At the same time, however, the United States is facing the vexing challenge of a seemingly uncontrolled rise in the cost of health care. Total medical expenditures are rapidly approaching 20 percent of the gross domestic product and are crowding out other priorities of national importance. The use of increasingly expensive prescription drugs is a significant part of this problem, making the cost of biopharmaceuticals a serious national concern with broad political implications. Especially with the highly visible and very large price increases for prescription drugs that have occurred in recent years, finding a way to make prescription medicines—and health care at large—more affordable for everyone has become a socioeconomic imperative. Affordability is a complex function of factors, including not just the prices of the drugs themselves, but also the details of an individual's insurance coverage and the number of medical conditions that an individual or family confronts. Therefore, any solution to the affordability issue will require considering all of these factors together. The current high and increasing costs of prescription drugs—coupled with the broader trends in overall health care costs—is unsustainable to society as a whole. *Making Medicines Affordable* examines patient access to affordable and effective therapies, with emphasis on drug pricing, inflation in the cost of drugs, and insurance design. This report explores structural and policy factors influencing drug pricing, drug access programs, the emerging role of comparative effectiveness assessments in payment policies, changing finances of medical practice with regard to drug costs and reimbursement, and measures to prevent drug shortages and foster continued innovation in drug development. It makes recommendations for policy actions that could address drug price trends, improve patient access to affordable and effective treatments, and encourage innovations that address significant needs in health care.

Patently Innovative R A Bouchard, 2012-01-02 Patently innovative provides a review of the importance of traditional patent law and emerging linkage regulations for pharmaceutical products on the global stage, with a focus on the linkage regime in Canada. The primary focus is on how innovation in the pharmaceutical sector can be strongly regulated and how government regulation can either stimulate or inhibit development of breakthrough products. Includes empirical research to relate innovation to drug law. A multidisciplinary approach is taken, including the intersection of IP (intellectual property) law, drug law and innovation. Discusses the impact of government regulation on firm innovation.

Michigan's Haunted Lighthouses Dianna Stampfler, 2019-08-26 Travel Michigan's coast—and into the state's history—with otherworldly tales of the spirits of those who sought to keep its waters safe. Michigan has more lighthouses than any other state, with more than 120 dotting its expansive Great Lakes shoreline. Many of these lighthouses lay claim to haunted happenings. Former keepers like the cigar-smoking Captain Townshend at Seul Choix Point and prankster John Herman at Waugoshance Shoal near Mackinaw City maintain their watch long after death ended their duties. At White River Light Station in Whitehall, Sarah Robinson still keeps a clean and tidy house, and a mysterious young girl at the Marquette Harbor Lighthouse seeks out other children and female companions. Countless spirits remain between Whitefish Point and Point Iroquois in an area well known for its many tragic shipwrecks. Join author and Promote Michigan founder Dianna Stampfler as she recounts the tales from Michigan's ghostly beacons. "Haunting tales of Michigan's lighthouses . . . Her stories come from lighthouse museums, friends and family."—Great Lakes Echo

Nancy Caroline's Emergency Care in the Streets, Canadian Edition Nancy L. Caroline, 2011-03-09 The Paramedic

Association of Canada, together with the American Academy of Orthopaedic Surgeons and Jones and Bartlett Publishers are proud to continue Dr. Nancy Caroline's legacy by introducing Emergency Care in the Streets-Canadian Edition! Dr. Caroline's work transformed EMS and the entire paramedic field. She created the first national standard curriculum for paramedic training in the United States. She also wrote the first paramedic textbook: Emergency Care in the Streets. In 2007, we welcomed back Emergency Care in the Streets with the publication of the Sixth Edition in the United States. Now, this program has been rewritten and revised by Canadian EMS experts specifically for Canadian paramedics, using the National Occupational Competency Profiles.

Public Health Consequences of E-Cigarettes National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Committee on the Review of the Health Effects of Electronic Nicotine Delivery Systems,2018-05-18 Millions of Americans use e-cigarettes. Despite their popularity, little is known about their health effects. Some suggest that e-cigarettes likely confer lower risk compared to combustible tobacco cigarettes, because they do not expose users to toxicants produced through combustion. Proponents of e-cigarette use also tout the potential benefits of e-cigarettes as devices that could help combustible tobacco cigarette smokers to quit and thereby reduce tobacco-related health risks. Others are concerned about the exposure to potentially toxic substances contained in e-cigarette emissions, especially in individuals who have never used tobacco products such as youth and young adults. Given their relatively recent introduction, there has been little time for a scientific body of evidence to develop on the health effects of e-cigarettes. *Public Health Consequences of E-Cigarettes* reviews and critically assesses the state of the emerging evidence about e-cigarettes and health. This report makes recommendations for the improvement of this research and highlights gaps that are a priority for future research.
