European Drug Index Niels F. Muller, Rudolf P. Dessing, 2022-03-07 Many health care providers are frequently dealing with problems related to the identification and interpretation of medicines and prescriptions of foreign origin. Health authorities, customs and travel agencies also encounter such problems, which are related to the increasing mobility of the European population. Thus the need for a European Drug Index is obvious. The EDI provides extended information for practitioners confronted with the enormous number of drug names available on the European pharmaceutical market. This market is increasing due to the rapidly changing palette of countries and economic restrictions in Europe. The listings have been derived from drug data sources from the increased number of participating countries in this second edition. Each item starts with a trade name, in alphabetical order, followed by (depending on the original source) dosage forms, strength, volume (if applicable), and generic name(s) of the active principle(s) in a random sequence. The item is concluded by the Anatomical Therapeutic Chemical (ATC) classification (when made available by the original source) and a code for the country of origin.

Treatment in Dermatology Barbara Leppard,2020-02-04 Many family doctors lack confidence in their treatment of skin disorders. However, once the basic principles are understood a rational approach can lead to the appropriate therapy. In this companion volume to the widely-used Differential Diagnosis in Dermatology, the same authors present a clear, logical and visual guide through the options. It offers specific advice on management of each condition, when to use ointments or creams, how much to prescribe, what active constituents should be used, what to tell patients and what to do if treatment fails or patients return. The information contained in these two volumes provide a comprehensive reference to the diagnosis and treatment of all but the rare and esoteric, and will lead to greatly improved patient care.
