ABC of Arterial and Venous Disease Richard Donnelly, Nick J. M. London, 2009-04-08 Structural and functional abnormalities of arteries and veins manifest clinically in a broad spectrum of disorders, including aneurysmal disease, atherosclerosis, vasculitis, venous insufficiency, microvascular complications, thrombo-embolism and lower limb ulceration. Many of these are common and/or chronic conditions which present for initial assessment by primary health care workers. This new edition is a practical guide to the most commonly presenting disorders, and provides a structured approach to clinical assessment, investigations and management. The last few years have seen major changes in the use of non-invasive or minimally-invasive techniques, e.g. wider use of CT and MR angiography, and increasing use of percutaneous interventions for carotid, lower limb and reno-vascular disease. The ABC of Arterial and Venous Disease (Second Edition) explains the underlying technology and the applications of new minimally-invasive methods, especially CT and MRI, and provides an up-to-date, evidence-based guide to the modern day management of patients with common, life-threatening diseases involving different parts of the circulation. This authoritative, full-colour, illustrated ABC is an ideal reference for the primary care, non-specialist practitioner to base effective management and prevention programmes.

The Pendragon Legend Antal Szerb, 2007-08-31 An absolute treat, deliciously ludic, to be read with a big smile on your face throughout.—Nicholas Lezard, Guardian AT THE END-OF-LONDON-SEASON soiree, the young Hungarian scholar-dilettante Janos Batky is introduced to the Earl of Gwynedd, a reclusive eccentric who is the subject of strange rumours. Invited to the family seat, Pendragon Castle in North Wales, Batky receives a mysterious phone-call warning him not to go. But he does, and finds himself in a bizarre world of mysticism and romance, animal experimentation, and planned murder. His quest to solve the central mystery takes him down strange byways—old libraries and warehouse cellars, Welsh mountains and underground tombs.

Creating Self-Regulated Learners Linda B. Nilson, 2023-07-03 Most of our students neither know how learning works nor what they have to do to ensure it, to the detriment both of their studies and their development as lifelong learners. The

point of departure for this book is the literature on self-regulated learning that tells us that deep, lasting, independent learning requires learners to bring into play a range of cognitive skills, affective attitudes, and even physical activities – about which most students are wholly unaware; and that self-regulation, which has little to do with measured intelligence, can be developed by just about anyone and is a fundamental prerequisite of academic success. Linda Nilson provides the theoretical background to student self-regulation, the evidence that it enhances achievement, and the strategies to help students develop it. She presents an array of tested activities and assignments through which students can progressively reflect on, monitor and improve their learning skills; describes how they can be integrated with different course components and on various schedules; and elucidates how to intentionally and seamlessly incorporate them into course design to effectively meet disciplinary and student development objectives. Recognizing that most faculty are unfamiliar with these strategies, she also recommends how to prepare for introducing them into the classroom and adding more as instructors become more confident using them. The book concludes with descriptions of courses from different fields to offer models and ideas for implementation. At a time of so much concern about what our students are learning in college and how well prepared they are for the challenges of tomorrow's economy and society, self-regulated learning provides a reassuring solution, particularly as studies indicate that struggling students benefit the most from practicing it.

Safe Patients, Smart Hospitals Peter Pronovost, Eric Vohr, 2010-02-18 The inspiring story of how a leading innovator in patient safety found a simple way to save countless lives. First, do no harm—doctors, nurses and clinicians swear by this code of conduct. Yet in hospitals and doctors' offices across the country, errors are made every single day - avoidable, simple mistakes that often cost lives. Inspired by two medical mistakes that not only ended in unnecessary deaths but hit close to home, Dr. Peter Pronovost made it his personal mission to improve patient safety and make preventable deaths a thing of the past, one hospital at a time. Dr. Pronovost began with simple improvements to a common procedure in the ER and ICU units at Johns Hopkins Hospital. Creating an easy five-step checklist based on the most up-to-date research for his fellow doctors and nurses to follow, he hoped that streamlining the procedure itself could slow the rate of infections patients often died from. But what Dr. Pronovost discovered was that doctors and nurses needed more than a checklist: the day-to-day environment needed to be more patient-driven and staff needed to see scientific results in order to know their efforts were a success. After those changes took effect, the units Dr. Pronovost worked with decreased their rate of infection by 70%.

Today, all fifty states are implementing Dr. Pronovost's programs, which have the potential to save more lives than any other medical innovation in the past twenty-five years. But his ideas are just the beginning of the changes being made by doctors and nurses across the country making huge leaps to improve patient care. In *Safe Patients, Smart Hospitals*, Dr. Pronovost shares his own experience, anecdotal stories from his colleagues at Johns Hopkins and other hospitals that have made his approach their own, alongside comprehensive research-showing readers how small changes make a huge difference in patient care. Inspiring and thought provoking, this compelling book shows how one person with a cause really can make a huge difference in our lives.
